

V90

PTFE JOINTING TAPE

Features

V90 is versatile because of its capabilities to handle all liquid and gases.

V90 is ideally suited for:

- . Flanges
- . Ducts
- . Tanks
- . Evaporators
- . Pump cases
- . Digesters
- . Transmission cases
- . Compressor housings
- . Drum lids
- . Portholes
- . Man ways
- . Towers
- . Glass joints
- . Heat exchanger
- . Sight glasses

PRESSURE	
200 bar	29000psi
TEMPERATURE	
-28°C + 316°C	248°F
VELOCITY	
1 m/s	200 ft/min
pH VALUE	
0 - 14	0 - 14

Design Description

V90 is a non-toxic, non-contaminating PTFE jointing tape. It has a sticky back for ease of installation and removal which saves labour in cleaning and machining.

It is tough but gentle making it useful in high pressure steam joints and fragile glass joints the same. Coming in various widths, thickness and lengths.

It is suitable for both critical and general service. Its limitations are that of free fluorine and temperature in excess of 260°C..
